

Meeting Title: RONALDO

Minutes of Meeting:

Summary by Topics

- Topic 1: Discussion about improvement in Machine Learning Pipeline and use of Semantic Embeddings instead of basic keyword matching
- Topic 2: Current status of Backend Performance, Security measures, Frontend Dashboard, and Demo preparation
- Topic 3: Decisions on optimizing Threshold Tuning and polishing the UI before the next 5 days

Key Discussion Points

- Machine Learning Pipeline improvements
- Performance metrics
- Security implementation
- Demo preparation
- Backend Performance
- Scalability concerns for future data growth
- Simplified explanation of Machine Learning Pipeline for demo judges
- Conversion of Intelligent Job Notification System and student profile to numerical vectors
- Automation of Email notifications with Cosine Similarity Score
- SMS integration in future roadmap
- Optimization of Threshold Tuning

Decisions

- Decision 1: Team agreed to use Semantic Embeddings
- Decision 2: Team committed to optimize Threshold Tuning
- Decision 3: Strategic choice to polish the UI before the next 5 days

Action Items

- task: Push updated UI build, owner: Speaker 1, due_date: Next 5 days, priority: High, confidence_score: 85
- task: Prepare Machine Learning Evaluation Report, owner: Speaker 1, due_date: Next 5 days, priority: High, confidence_score: 100

Risks

- Scalability issues for future data growth

Open Questions

- What needs clarification about the SMS integration in the future roadmap
